

## AUTOMATED ENTERPRISE APPLICATION DATA EXTRACTION

Insight's exclusive algorithm ensures all data is extracted with a single data request. Extractions are not constrained by pagination, filter, API rate or API instance limitations, therefore one request automatically delivers the complete extracted data file.

### **EXTRACT THE DATA IN A FORMAT TO MEET YOUR NEEDS**

Insights is the premier solution to provide data in several formats including JSON, CSV, TXT, ZIP, and SQL. Extraction supports Amazon S3, SharePoint, Qualtrics XM, SAP Data Warehouse, and more. Insights integrates to data analysis environments like Power BI, Tableau, SAP Cloud Analytics and more.

### **SEE BEYOND TRANSACTIONS WITH ENRICHED DATA**

Combine your data with other data sources at the time of extraction for detailed analysis to identify trends, savings opportunities and supplier leakage.

### **FULLY AUTOMATED DATA EXTRACTION**

Extract all your data in one download. Extractions are not constrained by pagination, filter, API rate, or API instance limitations. Insights automatically extracts all the data to complete the request in one transaction.

### **ENRICH YOUR ERP DATA**

Enrich your data with multiple custom sources before extraction. Gain insight into your transaction data by enriching your data for analysis.
