QUALTRICS XM FOR SUPPLIERS INTEGRATION

SEAMLESS ENTERPRISE APPLICATION & QUALTRICS XM FOR SUPPLIERS INTEGRATION

Automatically trigger supplier feedback requests from Qualtrics and transfer operational supplier data to Qualtrics via API. The Qualtrics XM platform combines operation data with experience data to identify gaps. Once identified, buyers can take action to address directly with suppliers and build better, more resilient supply chains.

SPEND PLANNING & ANALYSIS TO REFINE SUPPLY MANAGEMENT STRATEGIES

Perform data analysis in real-time and view in role-based dashboards to select the best supplier mix for performance/price ratio, and gauge supply availability for new products and services. Determine why suppliers are not responding to your RFx and if current suppliers are a good match for current and future capabilities.

DATA TRANSFER TO QUALTRICS XM

Automatically integrate your operational data into Qualtrics XM for powerful analysis, such as text analytics powered by Machine Learning, AI, and Natural Language Processing to surface top drivers and topics of supplier satisfaction.

MANAGE PRODUCT AND SERVICE DELIVERY

Determine how to best work with your suppliers by understanding their financial health, early payments and discounts options, PO process comparisons, and more.

ENABLE STANDARD SPEND JOURNEYS

Leverage your business intelligence and connect the moments that matter across the spend journey with your buyers including, Spend Planning & Analysis, Source-to-Order, Product / Service Delivery, and Payables.

ENABLE STANDARD SUPPLIER SPEND JOURNEYS
