

COLLABORATION PLATFORM INTEGRATION

Collaboration platform integration to streamline collaboration, communication and documentation in one platform during the source-to-settle process.

EXPERIENCE A FASTER TIME-TO-DECISION PROCESS

Streamline chats, training materials and documentation to create efficiency, reduce emails, phone calls and meetings during the source-to-settle process. Seamless integration using native APIs to other internal applications, connecting your entire enterprise in a single interface.

EMPOWER REMOTE WORKFORCE TO STAY CONNECTED

Improve team collaboration and quickly stay connected to activities with centralized file storage, video chat, text chat, and approval flow notifications. Take advantage of all collaboration platform functionality from your enterprise application.

IMPROVE COMPLIANCE

One single system to approve/deny and collaborate in the B&I process enabling true collaboration and transparency between all the users in every transaction.

ACHIEVE HIGHER ADOPTION RATES

Storage of training materials, easy access to approval flows, and team collaboration supports adoption of your enterprise application tool. This will save time and build efficiencies in your procurement process.

RELY ON REAL-TIME COLLABORATION NOTIFICATIONS

Receive notifications on your mobile phone, PC or tablet with direct links to the requisition. Take action immediately with all required information within the Team.

ACCESS TO YOUR ENTERPRISE APPLICATION IN ANY COLLABORATION PLATFORM

Direct access to your enterprise application from your collaboration platform. No need to access multiple applications to manage your transactions. Realtime notifications through your collaboration platform when you need to take action on your transactions.
